## GEOGRAPHIC DISTRIBUTION

*Instructions for contributors to Geographic Distribution appear in Volume 37, Number 1 (March 2006). Please note that the responsibility for checking literature for previously documented range extensions lies with authors. Do not submit range extension reports unless a thorough literature review has been completed.*

### SERPENTES

**AGKISTRODON CONTORTIX PHAEOGASTER** (Osage Copperhead). USA: KANSAS: COFFEY Co.: Slead Native Prairie next to Jacobs Creek on the Flint Hills National Wildlife Refuge, ca. 4500 m S of Hartford, ca. 800 m N on 16<sup>th</sup> Rd (38°16'01.9"N, 95°56'42.0"W). 01 August 2004. B.W. Maher. Natural History Museum, University of Kansas color slides (KU CT 11934–35). Verified by Lynnette Sievert. New county record replacing lost county record specimen (Taggart 2006. Kansas Herpetofaunal Atlas: an Online Reference: <http://webcat.fhsu.edu/ksfauna/herps/index.asp?page=species>). Juvenile specimen captured along silt-fence in single-ended funnel trap. PIT tag #451E721A05 inserted; individual was photographed and released as part of an ongoing research project. A second specimen was found dead in the same trap array on 03 August 2004 and was deposited in the Sternberg Museum of Natural History (MHP 12139).
